

CII Spotlight: 2018 Summer Interns

Emily McKelvey

Northwestern University – Kellogg School of Management

Master of Business Administration

Year: 2019

Emily McKelvey is an MBA student at the Kellogg School of Management at Northwestern University. Before coming to Kellogg, she worked as a project manager at a small strategy consulting firm called Kaiser Associates in DC. Most of her work consisted of assisting medical device and pharmaceutical companies identify, evaluate, and capitalize on potential market opportunities. Emily is passionate about market-oriented approaches to global health and has a BA in Public Policy from Duke University.

Nithya Rajendran

University of Michigan

Master of Health Informatics

Year: 2018

Nithya Rajendran is a recent graduate from the University of Michigan's Master of Health Informatics program in Ann Arbor. She received her Bachelor's of Science in Health Promotion with an area of emphasis in Health Services from the University of Georgia. Nithya's career interests fall within consumer health informatics and digital health. She hopes to leverage modern technology to support individuals in engaging in their own care and by creating a network of communication channels that extends healthcare delivery to everyday settings. Nithya's past experience includes working with Kaiser Permanente's Health Innovation Studio in Southern California, developing a mobile phone based application for type II diabetes self-management.

Nikita Srinivasan

Oxford University – Said Business School

Master of Business Administration

Year: 2018

Nikita Srinivasan is currently an MBA candidate at Oxford Said Business School. She received her BS in International Health from Georgetown University. Nikita started her career working with a small entrepreneurial team to improve primary care delivery for underserved populations in the Boston area. She designed and scaled data-driven solutions to a wide range of problems from population health management to provider efficiency. Through this work she realized the value of applying private sector principles to drive innovation in the public sector, which prompted a move into product management at a health tech startup, where she learned how to program, design, and launch new technical products.
